## Learning Objectives:

- Patient Care
- Optometric Knowledge
- Practice-Based Learning and Improvement
- Interpersonal and Communication Skills
- Professionalism

## Goals and Interns Responsibilities:

The Internship program will be a One year 15 days program, and the minimum amount of time to be devoted to clinical work will be 6 days per week. This clinical work will consist primarily of clinical posting with optometrists / ophthalmologists and independent patient care. Teaching and other requirements will fill the remainder of the week.

There will be one advisor/mentor assigned to assist the interns in activities related to the program. The advisor will act as an advocate for the interns and will provide ongoing guidance to the interns during the program.

The interns will actively participate in department meetings & optometry grand rounds.

The interns will spend approximately 4 days in a month in vision screening program. The responsibility of the interns performing clinical testing and assisting camp team in planning of the school screenings with completion of necessary paperwork.

Emergency duties on Sunday and night emergency duties according to roster

## Characteristics of the Program:

- a) A journal club specific to the optometry program will be held at least four times during the program for each individual interns
- b) The interns will prepare and present lectures for the benefit of undergraduate/Diploma students.

c) The interns also will be involved in maintaining of the logbook of the activities done during the program period. The interns will submit the filled logbook at the end of the 6th month and end of the 12th month to the respective advisor for comments.

d) The interns will also submit one interesting case report to the advisor/mentor every month.

e) The teaching program will include: Studying pertinent literature as required, attending didactic lectures and presenting cases and journal articles.

f) Monthly or quarterly assessment tests

g) The interns have to submit one project at the end of internship

h) At the end of the program the interns would have either observed and/or independently handled at least 250 cases.
